

Ministerio Vida Hospital

Ministerio Vida Hospital is located in San Pedro Sula, Honduras. It was founded out of the collaboration of In The Light Ministries of Harrisburg, PA, the Community Church of Plantation FL, CURE International and Dr. Josue Hernandez of the Honduran Congregational Mission. It opened its doors on August 18, 2014 to serve the Rivera Hernandez Community and over 250 patients have been treated by Dr. Josue and the staff.

CURE International abandoned their hospital building in the Spring of 2013. It sat empty until May of 2014 when it was given to *In The Light Ministries* for the purpose of serving the people of San Pedro Sula. The closest hospital to this one is an hour away.

The Medical complex which includes 6 buildings has two operating rooms, a chapel for services as well as a full kitchen and 8 fully furnished apartments, which can be use as housing facilities for volunteers and missionaries. Dr. Josue will be conducting monthly medical brigades to offer services to villages that do not have any medical services close. Volunteers are welcome to help with these. At the end of October a full website for Vida Hospital will be launched.
